Avocado Security Honors Top Graduates of DC Central Kitchen's Culinary Job Training Program

Kevin Shahbazi CEO of Avocado Security, the Pioneers of Security and Business Intelligence Optimization Platform Presents Awards at Graduation Ceremony

WASHINGTON, DC (January 22, 2008)... Avocado Security, developers of the world's first Security and Business Intelligence (BI) Optimization Platform as On-Demand solution, today announced that the company's CEO Mr. Kevin Shahbazi, will present awards during DC Central Kitchen's graduation ceremony, January 22, at 2 pm. DC Central Kitchen addresses the root causes of hunger with its Culinary Arts Job Training program, which began in 1990. The ultimate goal of the program is to prepare unemployed and homeless adults for careers in the foodservice industry.

"Just like we empower our customers with knowledge and information to make better business decisions, DC Central Kitchen empowers its participants with knowledge and information so they can make better life decisions," said Kevin Shahbazi, CEO of Avocado Security. "The talents of DCK's culinary program participants are a priceless asset. Every quarter, during graduation ceremony, we honor and celebrate outstanding talents for their participation, commitment, dedication, and present outstanding achievement awards to top graduates in three categories."

The "Avocado Security Foundation Awards" will be presented to April Parker for the Most Valuable Player category, Betty Griffin for the Most Improved category, and LaShawn Lewis for the Sunshine Award category.

Video surveillance security images may not be necessarily available when it is really needed. It may be due to the fact that the cameras or DVR had actually stopped recording well before an incident took place. Avocado Security's optimization platform immediately alerts office personnel to such serious security short comings. Operational security data, along with other security information, are fed thorough

Avocado Security's platform. Additionally, aggregated data is normalized and compiled for use by various departments as actionable business intelligence, to render business decision. Avocado Security platform is currently in use in select industries. Version 2.0 is due for release in Q2 of 2008.

About Avocado Security

Avocado Security's patent pending technology is the world's first security and Business Intelligence (BI) platform as On-Demand solution. This new technology brings about innovative security and productivity measures for clients who desire to improve their security, operation and IT infrastructure. By combining an advanced set of security and business intelligence metrics, Avocado Security's clients experience streamlined security operation, and in turn, dramatically improve their own bottom lines.
